

The Next Era of Media Growth Is AI-Driven

Powering Fortune 500 Media, Entertainment & Publishing Leaders

Media leaders have moved beyond AI experimentation. Competitive advantage now comes from operationalizing AI across **content, audiences, monetization. At Scale. With Measurable Impact.**

Straive partners with the world's leading broadcasters, streaming platforms, and publishers to embed data and AI into the core of their media ecosystems.

Working together to accelerate engagement, efficiency, and revenue growth.

Enterprise Impact at Scale

3x ROI on Enterprise AI Investments

50%+ operational efficiency gains

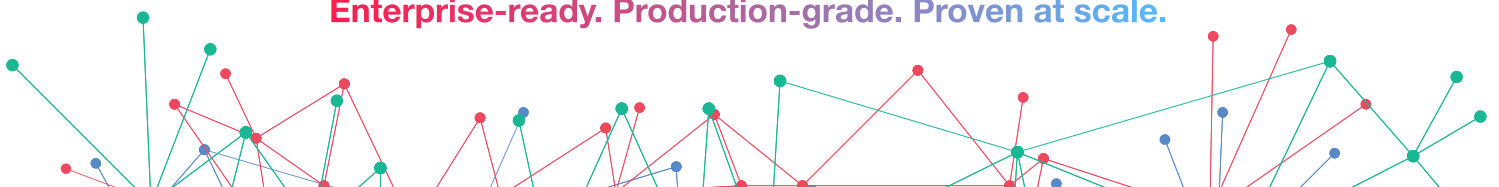

60% faster time to market

20-30% engagement lift via AI-driven personalization

95%+ automation accuracy in production environments

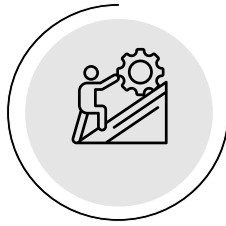

Delivering measurable outcomes across the world's most demanding media environments.

Enterprise-ready. Production-grade. Proven at scale.

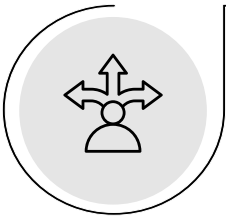

Enterprise Impact in Action

Scaling AI-Powered Content Intelligence for a Global Media Enterprise

The Challenge

A Fortune 500 media enterprise struggled with surging content volumes, fragmented metadata, slow time to market, and limited personalization capabilities, putting pressure on growth & operating margins.

The Straive Approach

Straive unified content metadata, audience intelligence, and operational workflows into a single AI-powered platform.

Production-grade AI was deployed across content enrichment, personalization, and workflow automation. The solution integrated seamlessly with the client's existing media stack.

The Impact

- Faster content deployment and discovery
- Major operational efficiency improvements
- Higher audience engagement and retention
- Measurable ROI delivered within months
