

Straive: Enabling Publishers to Protect the Integrity of their Content

Maintaining research integrity and publishing ethics are critical focus areas in the scientific community. At Straive, we offer innovative solutions that blend cutting-edge technology, rigorous processes, and comprehensive data analysis to achieve an optimal balance between detecting and deterring bad actors, identifying areas of author education, and preventing the rejection of suitable manuscripts due to false positives - all while adhering to publishing timelines and budgets.

What Sets Us Apart

Straive is committed to delivering exceptional RI support services while maintaining the highest standards of integrity.

- Established processes and workflows
- Highly qualified professionals with Masters & PhDs in various fields
- Combine human expertise and AI-ML tools for accuracy and reliability
- Domain experts review and verify results generated by AI-ML tools

Research Integrity Solutions

A team of **70+ FTEs** who are subject matter experts with domain knowledge and analytical/communication skills provide a range of solutions to maintain research integrity and publishing ethics.

Image Integrity

Analysis of images to identify instances of manipulation with the help of both technology and SMEs

Text Integrity

In-depth analysis of similarity check reports

Research Integrity Support

Initial triage and analysis of RI claims to enable quicker decisions

Data Analytics

Conduct trend analysis on reviewer acceptance & return times, and author/reviewer frequency to identify potential issues for further investigation

Enhanced Content Review

Thorough analysis of submissions to identify potential papermills

Reviewer Vetting

Research & vetting of potential reviewers to ensure suitability and prevent conflicts of interest

Maintaining research integrity and publishing ethics is critical for the scientific community. At Straive, we take this responsibility seriously, working closely with editors to identify and address potential issues before acceptance and publication.
