Straive

When submissions surge, every publishing decision matters more

FIVE SHIFTS SHAPING PUBLISHING

1. **SUBMISSION VOLUME**
   Editorial pipelines under strain.
2. **RESEARCH INTEGRITY**
   10,000+ retractions in 2023.
3. **OPEN ACCESS**
   Agreements, eligibility checks, payments, reporting.
4. **DIGITAL PUBLISHING**
   9.1% projected annual growth, 2026-33.
5. **AI LICENSING**
   $1.59 billion projected market by 2030.

STRAIVE AT PUBLISHING SCALE

~1 IN 5 papers globally

are supported by Straive during the publishing journey.

We combine publishing expertise, AI engineering, and scale to handle rising volume, protect quality, and make content more useful.

The Layered Accelerator Framework

From AI experimentation to better content experiences

Straive's connected layers help publishers develop AI capabilities, put them into live workflows, and use content and operational data to improve discovery and decisions.

01 Experiment: Foundation

Build and adapt AI for specific publishing needs.

LLM Foundry
Prototype and deploy generative AI solutions.

ELEVATE AI
AI across development and testing.

Straive X
Develop custom solution capabilities.

02 Execute: Workflow and Application

Embed AI across the content lifecycle.

aiKira Editorial Suite
Submission-to-decision journey.

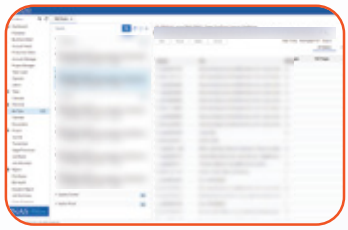

aiKira Publishing Suite
Acceptance through publication.

aiKira Transformation Suite
Prepare content for human & machine use.

SPACE A11y Suite
Accessible content and remediation.

03 Experience: Intelligence

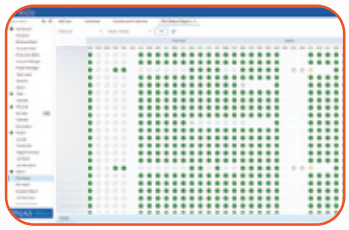

Turn content and operational data into greater value.

aiKira Discovery Suite
Improve search and content exploration.

aiKira Intelligence Suite
Reveal insights from data.

CX Suite
Improve service across customer channels.

Build • Run • Learn

The publishing flywheel

The connected strengths behind trusted publishing intelligence

Straive works across the publishing journey.
Each stage produces content, data, and operational insight that can strengthen the next.

The connection matters:

Validated content strengthens intelligence.
That intelligence helps publishers improve how they assess, produce, distribute, and safeguard content.

Proven impact

Results across publishing and content operations

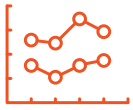

2M+
Assets Migrated
at 50% lower cost than the industry standard cited for the engagement.

2,000+
Complex ePUBs Remediated
for accessibility in eight weeks.

~50%
Reduction in APC Balances
overdue by more than 120 days.

10,000+
Contracts Audited
in eight weeks to assess derivative-use rights.

100%
Outputs Reviewed
using an AI-first quality framework.

75,000+
Clinical Cases Structured
into specialist-validated knowledge assets.

11
Languages
Legal content enriched via automated workflows.

Year-round
Fan Engagement
Supported through behavioral analytics and personalization.

About Straive

Straive helps global enterprises build and run AI by combining domain expertise with data and AI engineering. Its teams embed AI into core workflows and operate them to deliver measurable business impact.
