

Straive Named a Leader in AIM Research's 2026 PeMa Quadrant for Life Sciences and Healthcare AI Services

Recognition reflects Straive's ability to combine advanced AI capabilities with deep scientific, clinical, and regulatory expertise across life sciences and healthcare workflows.

New York, 3rd Aug 2026 – [Straive](#) has been named a Leader in AIM Research's *Top AI Service Providers for Life Sciences and Healthcare 2026* Penetration Maturity (PeMa) Quadrant.

The recognition reflects Straive's capabilities across clinical development, regulatory affairs, pharmacovigilance, scientific knowledge management, medical content automation, healthcare data engineering, commercial intelligence, and post-market surveillance.

Domain-Led AI for Life Sciences and Healthcare

Straive combines AI/ML, Generative AI, Agentic AI, and data engineering with proprietary accelerators, including ClinicalGen, Hypoforge, TrialIntel, and the Adverse Events Tool. These capabilities address workflows across clinical research, regulatory operations, pharmacovigilance, scientific knowledge management, and healthcare data enrichment.

The company's delivery model brings together 1,000+ life sciences professionals, including 600+ domain experts, 38+ PhDs, and 400+ AI/ML engineers, data architects, and MLOps specialists. This combination of technology and domain expertise enables Straive to develop and validate AI solutions for regulated healthcare environments.

On the occasion, Namit Sureka, President & Chief Data Analytics & AI Officer, Straive said: *"Being recognized as a Leader reflects our focus on combining advanced AI engineering with deep scientific, clinical, and regulatory expertise. We are committed to helping life sciences and healthcare organizations move AI beyond experimentation and into trusted, scalable, and production-ready workflows."*

Building on this foundation, Straive will continue investing in its AI and Data Centers of Excellence, industry-specific accelerators, responsible AI frameworks, and specialized talent.
