

Engineering the Future of AI-Driven Publishing

- Smart Content
- Intelligent Workflows
- Scalable Outcomes

Straiive AI Accelerator Suite

Purpose-built AI solutions that optimize publishing, editorial, accessibility, discovery, customer support, and software development workflows.

aiKira Publishing Suite

Accelerates accept-to-publish workflows through AI-driven automation, enabling faster production without compromising content integrity.

aiKira Discovery Suite

Improves discoverability and engagement through conversational search, supplementary data analysis, and intelligent content quality tools.

aiKira Intelligence Suite

Transforms publishing data into actionable insights, uncovering trends, bottlenecks, and opportunities for strategic editorial decisions.

aiKira Editorial Suite

Automates editorial workflows, accelerating decisions through AI-powered validation, reviewer discovery, and research integrity checks.

SPACE Accessibility Suite

Ensures scalable digital accessibility compliance across new and legacy content while preserving design and structural complexity.

Customer Experience Suite

Reduces support handling time while improving satisfaction through intelligent, personalized automation across customer service channels.

LLM Foundry

Enables secure experimentation, rapid prototyping, and scalable deployment of enterprise-grade generative AI solutions.

Elevate AI SLDC Framework

Accelerates software development through AI-driven automation, reducing SME effort and shortening testing and delivery timelines.

Proven Impact. Transformative Outcomes.

Large-Scale Content Migration

Migrated 2 million assets using proprietary workflows, achieving seamless transition at 50% lower industry-standard costs.

Accessibility Transformation

Remediated 2,000+ complex ePUBs in 8 weeks, ensuring full accessibility compliance without compromising design integrity.

APC Collections Optimization

Optimized APC collections through targeted recovery strategies, reducing 120+ day overdues by 50% and improving cash flow.

Licensing Intelligence

Audited 10,000+ contracts in 8 weeks, enabling derivative content monetization decisions and strengthened licensing risk management.

AI-Driven Quality Assurance

Implemented AI-first QA framework enabling 100% output review, ensuring accuracy across high-volume data and workflows.

Clinical Knowledge Enrichment

Structured 75,000+ clinical cases into validated knowledge assets using AI extraction and SME-led enrichment processes.

Multilingual Legal Content Automation

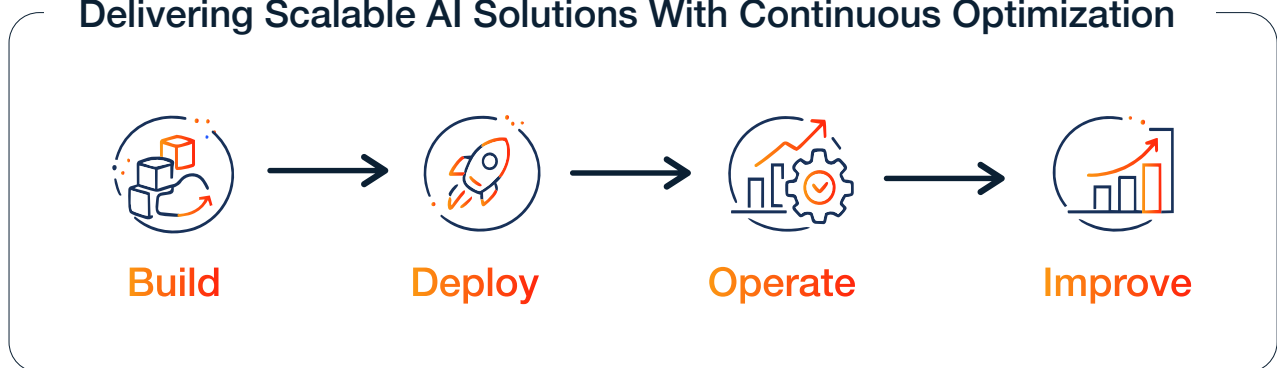

Automated legal content enrichment across 11 European languages through our ELEVATE AI framework, reducing dependency on specialized native-language expertise.

Fan Engagement Personalization

Enhanced year-round fan engagement through behavioral analytics, personalized experiences, and targeted digital interaction strategies.

Delivering Scalable AI Solutions With Continuous Optimization

About Straive

Straive is a global leader in AI-powered content, data, and analytics solutions for media, technology, and information-driven enterprises. We help Fortune 500 organizations transform content ecosystems into scalable intelligence platforms that drive growth, efficiency, and competitive advantage.
